

BEST AVAILABLE COPYSerial No.: 09/918,379
Examiner: Tadesse HailuREMARKS/ARGUMENTS

Claims 1-33 remain in this application.

All of the claims have been rejected as anticipated by the Jones et al. reference or as unpatentable over Jones et al. in combination with one of the patents to Yeung et al., Wyatt et al., Segan et al., or Pinsley et al.

All of Applicant's claims have the requirement "screens the user to make sure that the user comprehends information displayed" (claims 1 and 12) or "screening the user to determine if the user comprehends information displayed" (claim 23). Applicant uses the phrase, "see, read and comprehend the relevant information" at page 2, line 16 and 18 of the present application, so that the term "comprehend" is clearly used with the meaning, "understand".

The Examiner has stated in part 4 of the Official Action, in the section "With regard to claim 1", that "Jones discloses...displays dialog box...which validates or screens the user to make sure that the user understands the characterization..." However, Applicant respectfully submits that this is not the case. It is submitted that Jones provides for an override of the automatically rejected web page, but that the user and supervisor may easily ignore the information provided and treat the step as yet another password. By contrast, each of the examples given in the present application ask questions calculated to make sure the user is paying attention and "comprehends" the information.

It is believed the Examiner is correct in part 8 of the Official Action, where it is said that "Jones does not disclose a test within said dialog box to determine whether the user comprehend the information within said dialog box." Applicant disagrees with the Examiner that Pinsley et al. discloses or suggests the "test to the user to determine whether the user comprehends the information" recited in claims 3, 14 and 25 or the similar requirement of claims 1, 12 and 23 listed above. It is believed that Pinsley et al. merely discloses taking a survey. It could be true, as the Examiner states, that the survey information provides an effective way of understanding the user. Of course, that is not the same as the user understanding or comprehending the information.

Serial No.: 09/918,379
Examiner: Tadesse Hailu

Because Applicant submits that none of the applied references teach or suggest "screening the user to determine if the user comprehends information displayed" or the similar requirements of all of the present claims, it is believed that the present claims 1-33 are not anticipated by Jones et al. or unpatentable over Jones et al. in view of the various other references.

Accordingly, Applicant respectfully requests withdrawal of the Examiner's rejections of claims 1-33 and allowance of same. Should the Examiner have any further comments or suggestions, it is respectfully requested that the Examiner contact the undersigned to expeditiously resolve any outstanding issues.

Respectfully submitted,

ALCATEL
